

Bendi Tier III Press Release

November 2008

For Immediate Release

Landoll Introduces **New LP Gas Powered Bendi Forklift** *Model Drives with Electric Truck Feel*

- Integrated Demand Hydrostatic Drive, Lift and Steering System
- Tier III Certified, LP Gas, 2.4L GM Engine
- On-demand Fuel Injection for Increased Fuel Efficiency
- CAN-bus Electronics/Wiring
 - Simplified Maintenance and Diagnostics
 - Integrated Control Capabilities
- Calibration and Maintenance Diagnostics through Dash Display
- Via-Sonic Fuel Level Sensor with 99.5% Accuracy
- Improved Cooling and Reduced Noise Level

This new model meets all the demands of narrow aisle storage operations that require precise control in tight aisles at high elevations. The electric truck feel adds to operator confidence and performance, thereby increasing productivity and improving efficiency. For multi-shift operations expensive extra batteries and space consuming charging stations are eliminated. Available in 4,000 lb. (1,818kg) capacity with lift heights to 360" (9.14M).
